

## Dräger Swede Survival Phase 5 - Multi-Story

Dräger believes in the progressive learning process when training firefighters about the characteristics of fire. The instructional program can be traced to the multi-phased live fire training program developed by the Swedish Rescue Services Agency in Skovde, Sweden.

In the Phase 5 system firefighters will have the opportunity to gain tremendous insight into the complexities inherent in multi-story, multi-fire involved structural fire situations.

### COMPARTMENTS OF THE PHASE 5 TRAINING SYSTEM

The training enclosure is made up of two fire compartments located in two of the five containers, these are the burn chambers. The remaining compartments are utilized for staging, approach and search and rescue operations, these are the cold chambers.

### CHAMBER WALL AND CEILING INSULATION

Chamber walls and ceilings are lined with high temperature insulation material, which is protected behind a seam welded layer of 8 gauge steel. This protects the structural integrity of the container from the grueling temperature swings the container is designed to withstand over many hundreds of training evolutions.

### TWO DAY INSTRUCTORS CERTIFICATION WORKSHOP

This workshop is conducted by two experienced instructors. These instructors have conducted at least 100 training evolutions in a Phase 5 system. This training and certification process assures that instructors are thoroughly familiarized with the safe and effective use of the Dräger Swede Survival Phase 5 training system.

The Phase 5 system – the Burn Chamber located on the first floor.

Interior stairwell is equipped with hand rails on either side which adhere to OSHA regulations.

**TECHNICAL DATA**

- Partek high performance insulation
- 14 gauge steel exterior
- 8 gauge sheet metal covering insulation
- 10 gauge steel flooring
- 5/8" chain on walls, ceiling, and doors of burn area
- Concrete paving to line floor of burn area
- Ventilation system
- Doors and windows in the Cold Chambers
- Hand rails on the roof
- Interior & exterior stairs
- Crib fire drum- 2 each
- Paint - Royal Blue or Red Oxide

**THE SYSTEM INCLUDES**

- Complete Dräger Swede Survival Phase 5 System
- 2-day training course for up to 12 instructors
- Instructors certification upon completion

**TRAINING COURSE INCLUDES**

- Two certified instructors
- Ignition sources
- Fire behavior
- Formation of fire gases
- Fire control
- Container operations
- Hydration
- Heat stress
- Hydraulic ventilation
- SCBA and safety equipment training
- Heat stress management
- Smoke conditions recognition
- Container management
- Safety

**OPTIONS AVAILABLE**

- Custom paint colors and logos
- Training instructor from Swedish Rescue Training Center
- Training at Swedish Rescue Training Center, Skovde, Sweden

"... There are so many advantages to the Phase 5 training system. We can safely and readily train our firefighters in; entry, search & rescue, suppression, ventilation, communications, as well as firefighter safety, survival and RIT. The options are limitless."

Brett Laitila – Asst. Fire Training Instructor  
Thornapple Township Emergency Services  
Middleville, MI

"During the past six months the LAFD has conducted over 250 burns without incident of injury or damaged equipment."

Battalion Chief John Nowell  
Los Angeles City Fire Dept.
